PROFESSIONAL SUMMARY

Software Engineer with 4+ years of experience specializing in frontend development with React.js, Next.js, and React Native. Experienced integrating REST APIs and GraphQL on the frontend and building backend services using Node.js with the Fastify framework. Comfortable working across the full stack with a strong focus on building clean, maintainable UI, smooth API integration, and delivering reliable features in collaborative Agile teams.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3, SCSS, Tailwind CSS

Frontend: React.js, Next.js, React Native

Backend: Node.js, Fastify, Express.js, REST API Development

State Management: Redux, Redux Toolkit, React Context API, Zustand

API Integration: REST API (Axios, Fetch), GraphQL (Apollo Client), WebSocket's

Tools & Platforms: Git, GitHub, Postman, Vercel, Netlify, VS Code, Cursor, Windsurf

Competencies: Agile/Scrum, Cross-functional Collaboration, Code Review

WORK EXPERIENCE

Software Engineer

Keeyu2023 – Present

- Built and maintained frontend features using React.js and Next.js, integrating REST APIs and handling complex UI state to deliver responsive, user-friendly interfaces.
- Consumed and managed GraphQL queries and mutations on the frontend
- Developed backend API endpoints using Node.js with the Fastify framework, writing route handlers and business logic to support frontend feature requirements.
- Worked with Next.js SSR and SSG to improve page load performance and SEO, configuring data fetching strategies based on content requirements.
- Built reusable React components and maintained a shared component library used across multiple features, improving development consistency and speed.
- Collaborated with designers and backend team members during sprint planning and daily standups, participating in code reviews and contributing to a cleaner codebase.

Associate Software Engineer

Eritheia Labs2022 – 2023

- Developed frontend screens and components using React.js and Next.js, integrating REST APIs to connect UI with backend data and keeping state in sync across the application.
 - Implemented GraphQL queries on the frontend using Apollo Client, fetching and displaying dynamic content from the server with proper loading and error handling.
 - Contributed to Node.js backend services, writing API routes and handlers to support new frontend features and fixing issues raised during QA testing.
 - Worked on React Native screens for mobile features, reusing existing logic, and adapting UI components to suit mobile layouts and interactions.
-

KEY PROJECTS

Keeyu – Centralized E-commerce Platform — *Software Engineer*

- Worked on a multi-marketplace order management platform that allows businesses to track and manage orders from multiple sales channels in one place. Built frontend features with React.js and Next.js, integrated REST APIs to sync order data, and developed backend routes using Node.js and Fastify.
- Implemented real-time order status updates on the frontend by consuming WebSocket events, keeping the dashboard in sync without manual page refreshes.
- Integrated marketplace APIs on the frontend, mapping responses to UI components and handling edge cases like failed syncs and partial data.

Boss Bodies – Fitness & Nutrition Management Platform — *Software Engineer*

- Contributed to an all-in-one fitness platform with features for nutrition planning, supplement shopping, and recipe browsing. Built and integrated frontend screens using React.js, consuming REST APIs for meal plans, user profiles, and product listings.
- Worked on the React Native mobile screens for the platform, adapting existing web flows to mobile-friendly layouts and navigation patterns.

Criclay – Cricket Matches, Stats & Rankings Platform — *Software Engineer*

- Built frontend screens for cricket stats and live scores platform using Next.js. Integrated GraphQL queries using Apollo Client to fetch live match data, player statistics, and rankings, with real-time score updates via WebSocket subscriptions.
- Used Next.js SSR for match and player detail pages to improve SEO and ensure fast first-load performance for search engine visibility.

KrispX – Real-Time Car Listings & Transaction Platform — *Software Engineer*

- Developed frontend screens for car buying and selling marketplace using React.js. Integrated REST APIs for listing creation, search filters, and vehicle detail pages, with live updates on listing availability.
- Built search and filter functionality on the frontend, connecting UI controls to API query parameters to support filtering by price, make, model, and location.

Workplace Checking – Employee Management Dashboard — *Software Engineer*

- Built a React.js dashboard for employee check-ins, leave requests, and attendance tracking. Integrated REST APIs to display real-time workforce data and implement form flows for leave management and check-in submissions.
- Developed exportable attendance and leave report views on the frontend, formatting API data into structured tables with download functionality.

EDUCATION

- **BS Computer Science**, The University of Faisalabad
- **FSC Pre-Engineering**, Jinnah College, Gojra

INTERESTS

Passionate about modern web development, performance optimization, and exploring emerging technologies. Continuously improving skills through self-learning, open-source contributions, and staying updated with industry trends.
